***Reasons for Allowance***

1. Claims 13-24 (renumbered 1-12) are allowed.

The following is an examiner's statement of reasons for allowance: amendments filed February 11, 2009 overcome the previously outstanding rejections as set forth in the previous Office Action (mailed September 11, 2008) (see item 2. "Statement Regarding 35 U.S.C. § 101 and In re Bilski" below). Particularly, the claim features of "a method for determining the optimal coefficients  $C_{i,j}$ ,  $i$  being a row index varying from  $-P$  to  $+P$  and  $j$  a column index varying from  $-Q$  to  $+Q$ ,  $P$  and  $Q$  being positive integers, of a distance transform chamfer mask providing estimations of distance between pixels of an image, said coefficients being approximations, to within a multiplicative scale factor  $n$ ,  $n$  being a positive integer, of the distances of an image pixel subjected to the analysis of the chamfer mask with respect to the image pixels that are closest in the various so-called pixel directions of the mask, each coefficient being associated with the pixel of the mask whose distance it represents, and the determination consisting of a choice, for each coefficient, of a value selected from among a set of candidate values for the coefficient considered, said method having, as choice criteria: the maximum distance estimation error rate caused by the choice of two candidate values for a pair of coefficients, in the distance estimations of the image pixels contained in an angular sector of the image, delimited by two axes of displacement of the image corresponding to the directions going from the source pixel subjected to the analysis of the chamfer mask to the two pixels of the mask that are associated with the coefficients considered," common to the independent claims, is not fairly taught or suggested by the prior art of record alone or in combination. Accordingly, no outstanding rejections or objections remain.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Statement Regarding 35 U.S.C. § 101 and In re Bilski***

2. Applicants' amendments to the independent claims has overcome the previously outstanding grounds of rejection under 35 USC §101. Specifically, the amended claims necessarily require the use of a particular machine (e.g. a computer or an image processor) to execute the critical claim steps of: the first and second sort operations, the arbitrary selection operation, the aborting operation and the developing of a two-dimensional map. That is, it would not be reasonable for a person to manually execute the steps of the method as claimed, therefore, the ordinarily skilled artisan reading the independent claim would understand that a particular machine (e.g. a computer or processor) is being used to execute the steps of the method. Accordingly, independent claim 13 (renumbered 1) passes at least the "machine prong" of the Bilski machine-or-transformation test.
